Resort Technologies, LLC, Announces Solay Website Debut and Solay App Beta Release Coming Q1 2020

Users across the globe can soon reserve poolside and beachside seating, with a tap not a towel.

(San Diego, California, January 2, 2020) - Resort Technologies, LLC, proudly announces the completion of its official website and the upcoming beta release of the Solay app, designed to eliminate the frustration of poolside and beachside seating by providing guests a seamless means of reserving in advance.

The official Solay website debuts today at www.solayapp.com, introducing the app to the world and encouraging users to sign up for details about the beta release planned for Q1 2020. While in the beta phase, Solay will provide solutions to hotels and resorts in the San Diego and Los Angeles areas, before the official launch of the app later in the year.

About Solay

Solay is an intuitive global technology application that will eliminate completely the early wake up and frustration of the “chair dash” - promising to enhance every guest user’s vacation experience. Guests who choose to reserve poolside and beachside seating with Solay pay a nominal morning, afternoon, or all-day fee. Every guest that uses Solay will make a positive environmental impact on conservation and restoration of our oceans, as Solay has committed to giving back a portion of its revenue to organizations supporting these efforts.

In addition, Solay provides complimentary solutions to participating hotel, resort and cruise ship owners, managers, and operators such as controlled seating, inventory and other services, as well as reporting on volume expectations, generating reservations data on a daily or hourly basis, and more.

About Resort Technologies, LLC

Resort Technologies, LLC, is a San Diego-based technology firm founded in 2019 to develop innovative technology solutions in the hospitality space. Most notably, the company focuses on addressing inefficiencies in the market of resort guest experiences. With the launch of their first product, the solay™ app, resort guests can effortlessly make advance reservations of poolside and beach lounge chairs and cabanas at resorts, completely avoiding the hassle of unreserved seating. In keeping with its mission to enhance the guest experience, Resort Technologies gives a portion of every reservation back to nonprofits engaged in environmental conservation and ocean restoration. The company will be announcing new features to the solay™ app along with continued development plans for hospitality technology solutions in the future. Sleep in, your seat is set.
